

## Abstract 157

### ADVANCED RETINOBLASTOMA CASES

Moreno D.\*, Ocampo I., Huerta J.

*Hospital Español ~ Mexico City ~ Mexico*

Retinoblastoma is seen in 25 of 10 000 births in México. Retina fundus sceening is mandatory at 28 days of life

We are presenting 3 bilateral complex cases of retinoblastoma and the management. The treatment include intra arterial chemotherapy, intra ocular chemotherapy, TTT, láser, cryo and sistemic chemotherapy in some cases.

We save the eyes of the babies during time, combined management was neded in all cases.

We can save the eyes with the babies with retinoblastoma if we combine treatments and avoid the enucleation in some cases
